Bath shoe

The bath shoe is worn during showering or bathing and the user can wear the heavier design of this shoe to go swimming (in chlorine, freshwater and salt water).

Please note! This is not a hiking or walking shoe.

SP701

SP700

SP702

Rubber shoe

The rubber shoe can be used for working in the garden, in the countryside or in factories, and it replaces the rubber Wellington boot.

Please note! This is not a hiking or walking shoe.

The shoe is 100% watertight.

SP710

Technical information

SP700

Inside: 3 mm Ercoflex.

Outside: 4 mm thermoplastic EVA material.

Available in the colors black (F518) and gray (F519) 3 mm thick

According to personal preference, before delivery drill or punch holes in the facing to allow the water to drain.

SP701 + SP702

Choose from the following materials and colors:

Synthetic leather:	
Synthetic Lining look crumbled white	F771
Synthetic Lining look smooth white	F772
Synthetic Leather look m-brown	F773
Synthetic Leather look dark brown	F774
Synthetic Leather look gray	F775
Synthetic Leather look black	F776

The inlay is manufactured from 100% EVA material (if required can be delivered, or we can manufacture this). The shoe is only available in a high design and it always has Velcro, with a Poro heel add-on with Nopair outer sole. The wedge heel can, if required, be weighted with lead to enable swimming. All orthopaedic devices are possible in the bath shoe.

Method of ordering

The bath shoe can be ordered using the standard order form.

Under model, indicate "bath shoe" and the corresponding product number shown in the catalogue.

Indicate the height of the shoe upper.

Securing stitch point: show on the last (always laced).

Delivery time: maximum 21 calendar days.

According to personal preference, before delivery drill or punch holes in the vamp to allow the water to drain.

Technical information

Inside: 3 mm Ercoflex.

Outside: 2 mm Crepina soft.

Inlays: EVA material.

Finish: only in a high finish with watertight tongue.

Extra: can be supplied with a steel nose.

Choice: bottom and sole material – free choice.

Color: available in black and brown.

All orthopaedic devices are possible in the rubber shoe.

The inside and outside of the shoe can be rinsed clean with water.

Method of delivery

The rubber shoe can be ordered using the standard order form.

Under model indicate "rubber shoe" and the corresponding product number shown in the catalogue.

Indicate the color (black or brown).

Indicate the height of the shoe upper. Indicate vamp length on the last (always lace-up boot).

Delivery time: maximum 21 calendar days.

Sock shoe

The sock shoe (moulded footwear) is for people who are unable to walk or who are wheelchair-dependent, but who would like a little extra protection for their feet.

SP720

SP721

SP722

Technical information

Generally manufactured without inlays. If required, the product can also be manufactured with orthotics.

No inner sole.

Lining: the entire inside is made from lining material.

Outside: can be made from any type of upper leather.

The anti-slip sole can also be adhered as a durable sole underneath the sock shoe.

Finish: in any finish that is desired (hooks/rings/Velcro/zip).

Method of ordering

The sock shoe can be ordered using the standard order form.

Under model indicate "sock shoe" and the corresponding product number shown in the catalogue.

Indicate the color.

Indicate the height of the shoe upper.

Indicate vamp length on the last (always lace-up boot).

Delivery time: maximum 21 calendar days.

House shoe

The house shoe is an indoor house shoe for people who do not have serious orthopaedic abnormalities.

The same foot profile is used as the profile for the orthopaedic shoes, in order to ensure pressure distribution that is as even as possible.

Model SP730 is a loafer with elastic fastening.

Model SP731 is a clip fastening with Velcro and loop. A lace fastening can also be added to this.

Model SP732 is a low model with Velcro fastening and deep instep.

SP730

SP731

SP732

Technical information

Available in the following materials and colors:

Microfibre + Foam + Flannelette:

Light beige	F721
Beige	F722
Taupe	F723
Brown	F724
Black	F725

Nylon Fibre + Foam + Felt:

Beige	F731
Blue	F732
Brown	F733
Black	F734
Blue Velcro touch:	F735
Black thermo felt:	F736

Rhenoflex heel stiffeners

Poro wedge heel flat with Nopair sole 6 mm. A heel stiffener can be placed

between the two layers of the backside. Then the second layer will be as large as the heel stiffener.

Please note: Please take into account that the house shoe is a "simple" product and therefore has different properties to orthopaedic footwear.

Method of ordering

House shoes can only be ordered along with a delivery of a full pair of orthopaedic shoes. The delivery time for a full pair of house shoes with shoes is a maximum of 28 calendar days.

The house shoes can be ordered using the standard order form.

Under model indicate "house shoe" and the corresponding product number from the catalogue.

Preferably do not include any extra duplicate lasts because of the additional shipping costs. If required supply a double pair of inlays or give the instruction for a 2nd pair of inlays to be supplied. If a double pair of inlays is not supplied, or if the instruction is given for a new pair of inlays, then the inlays that are supplied can be reused to manufacture the house shoes.

Indicate the color. Indicate the house shoe upper height. Indicate vamp length on the last. Indicate the heel height (are always flat wedge, heel hollow).

As standard, the house shoe has a heel stiffener between the two layers of the backside. Additional charges apply for placing a different heel stiffener shape. A nose reinforcement is not possible.
